

The distillers for solvents/water model "LM" have been designed to meet the needs of all companies that need to distill / recover solvents/water polluted during the working process by inks, pigments, oils or fats and which for logistical problems they have limited space.

MAIN FEATURES THAT DIFFERENTIATE THESE MONOBLOCK MODELS

- The height designed to facilitate the loading of the polluted solvent and the extraction of the bag containing the distillation residues thus avoiding heavy operations by the operator
- Possibility of tilting for cleaning the boiler
- Electrical panel on board machine with color display with management of all settings by means of a single knob both for the ATEX 2G version and for the ATEX 3G version
- Possibility to set double distillation cycle for those solvent mixtures with different boiling points
- End-of-cycle thermostat vapor control, this thermostat controls the outgoing vapors and blocks the cycle if the machine has finished the distillation before the set time
- Safety for controlling the overheating of the diathermic oil, the distillate and the motor fan
- Mechanical safety: overpressure of the vapors and diathermic oil
- Predisposition for the management vacuum

MODELS WE OFFER

- Load capacity: 12-30-60-120 liters

- Electrical versions: ATEX EX II 3G (ZONE 2) - ATEX EX II 2G (ZONE 1)

Condenser: Copper - Stainless steelCover gaskets: Epdm - Viton - Teflon

STANDARD FEATURES

Electric version	ATEX EX II 3 G (zone 2)	ATEX EX II 2 G (zone 1)
Distillation method	Heating elements immersed in Diathermic oil	Heating elements immersed in Diathermic oil
Effective loading capacity of the boiler in Aisi 304 stainless steel	12 liters	12 liters
Condenser with cooling coils	Copper	Copper
Lid diameter 300mm; Material: stainless steel 304	Blind	Blind
Gasket lid	EPDM	EPDM
Diathermic oil	12 liters	12 liters
Heating power through resistance	1200W	1200W
Cooling type	Air	Air
Electrical panel on board machine	ATEX 3 G with color display	ATEX 2 G with color display
Overtemperature safety devices	Oil - Distillate - Motor fan	Oil - Distillate - Motor fan
Mechanical safety	Over pressure valves and diathermic oil	Over pressure valves and diathermic oil
Additional safety	Vapor temperature	Vapor temperature
Cycle settings	Double settings per cycle: 2 Temperatures and 2 durations	Double settings per cycle: 2 Temperatures and 2 durations
Liability	Vacuum management	Vacuum management
Machine delivery kit	3 heat-resistant bags	3 heat-resistant bags
Dimension	706x506x965 h mm	706x506x1060 h mm

OPTIONAL

condenser	Stainless steel Aisi 316	Stainless steel Aisi 316
Lid diameter 300mm, Material: stainless steel 304	Double inspection	Double inspection
Gasket lid	Viton - Teflon	Viton - Teflon
Pneumatic Vacuum Generator (distillation of high boiling solvents with max boiling point 220 ° C)	Painted iron - stainless steel	Painted iron - stainless steel
Electric vacuum generator (distillation of high boiling solvents with max boiling point 220 °C)	Painted iron - stainless steel	Painted iron - stainless steel
Additional condenser (for zones of use at high ambient temperatures)	Water cooling	Water cooling
ONLY FOR WATER TREATMENT (ACTIVATED CARBON FILTER)	Distilled water filtration group with passage to activated carbon	Distilled water filtration group with passage to activated carbon

Heat-resistant bags	Pack of pcs. 50	Pack of pcs. 50
Diathermic oil	Tank of 5 - 30 liters	Tank of 5 - 30 liters
ONLY FOR WATER TREATMENT	Packaging 1 pc	Packaging 1 pc
Replacement cartridge for granular	Puckaying 1 pc	Puckuging 1 μc
activated carbon		
ONLY FOR WATER TREATMENT	25 kg bag	25 kg bag
25 kg bag of granular activated carbon.		

STANDARD FEATURES

Electric version	ATEX EX II 3 G (zone 2)	ATEX EX II 2 G (zone 1)
Distillation method	Heating elements immersed in Diathermic	Heating elements immersed in Diathermic
	oil	oil
Effective loading capacity of the boiler in Aisi 304 stainless steel	30 liters	30 liters
Condenser with cooling coils	Copper	Copper
Lid diameter 400mm; Material: stainless steel 304	Blind	Blind
Gasket lid	EPDM	EPDM
Diathermic oil	14 liters	14 liters
Heating power through resistance	2500W	2500W
Cooling type	Air	Air
Electrical panel on board machine	ATEX 3 G with color display	ATEX 2 G with color display
Overtemperature safety devices	Oil - Distillate - Motor fan	Oil - Distillate - Motor fan
Mechanical safety	Over pressure valves and diathermic oil	Over pressure valves and diathermic oil
Additional safety	Vapor temperature	Vapor temperature
